

## Construction Update

# Cambridge-Johnson STP 2925(1)

### [Cambridge-Johnson VT 15 Resurfacing Project]

**DATE:** Friday, October 25, 2024

**TRAFFIC IMPACT AND DURATION:** On Saturday, October 26, between 6 a.m. and 7 p.m., there is potential for a single-lane closure on VT 15 near the Vermont Agency of Transportation's (VTrans) District #8 garage for paving operations, weather-permitting. Flaggers will be on-site to manage alternating one-way traffic.

From Monday, October 28, to Friday, November 1, between 6 a.m. and 7 p.m., three traffic control packages will facilitate alternating one-way traffic on VT 15, from Park Street in Johnson west to the VT 15/VT 108 roundabout in Cambridge.

**Motorists should expect delays mid-week at the VT 15/VT 108 roundabout in Cambridge due to paving operations.** *Motorists are advised to plan for extra travel time, slow down, and exercise caution while traveling through the project area.*

**CONSTRUCTION ACTIVITIES:** This Saturday, and continuing next week, crews will finish paving the intermediate course of asphalt along VT 15, starting near VTrans' District #8 garage and progressing west to the VT 15/VT 108 roundabout. *Paving operations are weather-dependent.*

From Monday to Friday, crews will begin to install guardrail runs, and continue berm removal, ditching, landscaping, and general cleanup along VT 15 in Johnson and Cambridge.

*Crews continue paving the intermediate course of asphalt along VT 15 in Cambridge, VT.*

**LOCATION:** Vermont Route 15 from the VT 15/ VT108 junction in Cambridge, continuing 9.1 miles to a point east of the VT 100C intersection in the Village of Johnson.

**PROJECTED COMPLETION:** Fall 2025
